## PERSONAL PROJECTS

---

### Crowdfunding Platform

[GitHub Link](#)

*Tech Stack: MERN (MongoDB, Express.js, React.js, Node.js)*

- Full-stack platform enabling users to create and contribute to campaigns.
- Integrated Cashfree payments and JWT-based user authentication.
- Designed RESTful APIs for campaigns, donations, and user roles.
- Built user dashboard to track contributions and manage campaigns.

### Farm to Table

[GitHub Link](#)

*Tech Stack: React.js (Frontend), MySQL (Backend)*

- Developed a web app connecting farmers directly with consumers.
- Frontend built with React.js; backend powered by MySQL for data handling.
- Features include product listings, order placement, and profiles.
- Promoted sustainability by eliminating intermediaries.

### Pomodoro Timer

[GitHub Link](#)

Web-based productivity tool with countdown, cycle tracking, and minimal UI.

## CERTIFICATIONS

---
